DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

Ohrn (U.S. 6,000,438) and Watkins (U.S. 6,058,979) both fail to disclose the following patentable limitations of the applicant's claimed and disclosed invention:

- A device and process for the heat insulation of at least one underwater pipe intended to be laid on the sea bed at great depth, comprising an insulating coating surrounding the latter and a protective envelope characterized in that the insulating coating comprises a virtually incompressible liquid/solid phase change material with a melting temperature T_0 higher than that T_a of the medium surrounding the pipe in operation and less than that T_1 of the effluents circulating in the pipe;
- the protective envelope is resistant and deformable and ensures a containment about the insulating coating the protective envelope being deformable to follow variation in volume of the insulating coating that it contains under the effect of hydrostatic pressure and variation in temperature.

The combinations of the claimed limitations are novel and found to be allowable over prior art. The cited reference taken singly or in combination does not anticipate or make obvious applicant's claimed invention.

Allowable Subject Matter

2. Claims 1-3 and 5-31 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
